

English language requirements and tests policy

Date last reviewed	May 2009
Scheduled review	
Approved by	Council

Purpose

The purpose of this policy is to ensure oral health practitioners can comprehend and communicate effectively, by setting out English language requirements for practising in New Zealand.

Scope

This policy applies to all applicants for registration, including New Zealand graduates.

Policy

1. Applicants must satisfy the Council that he or she is able to communicate effectively, and that his or her ability to communicate in and comprehend English is sufficient to protect the health and safety of the public.

Poor English or other communication skills can jeopardise patient health and safety. For example, without these skills the informed consent and active participation of the patient in their care may be compromised.

2. Applications for registration are normally considered to have met the English language requirement if:
 - (a) The applicant has graduated from:
 - i. A Dental Council accredited programme; or
 - ii. A Dental Board of Australia approved programme; or
 - (b) English is the applicant's first language; and the applicant has completed their undergraduate dental training in United Kingdom, USA, Eire or Canada where English is the sole language of instruction and assessment; or
 - (c) The applicant has passed a Council approved English test to the required level.

3. An applicant may be required to provide proof of English language competence at any time.

The Council has discretionary power to require proof of English language competence at any time.

4. Deficiencies in English communication skills reported after registration may require remedial training and skills assessment.

If deficiencies in skills are reported subsequent to registration, practitioners may be required to undertake remedial English training and then pass the communication skills assessment of the dental registration examination and/or an approved English test.

- Where an applicant sits an English test, his/her pass will be valid for two or three years.

A pass in a Dental Council approved English test is valid for two years for new applications or three years for those repeat registration examination candidates who can demonstrate, if required, that they have continuously lived and worked in a country where English is the first language.

Dental Council approved English tests and required pass rates

Results from the following language examinations must be obtained in one sitting.

- International English Language Testing (IELTS):

	Level of proficiency
