Subject: proposed increases in DCNZ fees

To whom it may concern

I am writing to express my concern at the proposed increases in DCNZ fees. I feel very strongly that the proposed protocols and procedure documents from DCNZ are not necessary in that the NZDA does already have procedures and protocols in place that are existing profession led standards, regularly updated and reviewed over many years. I do not agree to further increases in DCNZ fees to support further duplication of processes that are in essence already in place. The NZDA has always been very proactive in maintaining standards in the profession, is there really a requirement for DCNZ to burden us with further protocols and procedures and all the paperwork and time involved in putting these in to practice in a way that the DCNZ demands.

Yours sincerely

Dr Barbara Cater BDS
