**Subject:** Feedback on consultation re a revised oral health therapy scope of practice

Hi,

As a BOH graduate I am in support of the reviewed proposed OHT scope of practice. I especially like the proposed consultative professional relationship between OHT and other dental practitioners. This is one thing that is lacking in our current scope and does not lend to good communication between the dental hygienist/therapist and dentist, especially in private practice.

Thanks,  
Marija Lovric (BOH).
