Page 4: Area for change one: public assurance

Q5 Each of the seven statements below are equally important components of good oral health care. We want to identify where there are gaps or weaknesses in the way our oral health practitioners serve the public. Please rank the components from 1-7, with one being the component you think needs the most improvement and seven being the component you think needs the least improvement:

- Patients receive appropriate information about their treatment and care **6**
- Patients feel they are treated with dignity and respect at all times **5**
- Patients know how to complain about treatment they have received from their practitioner **7**

Q6 Do you think the Dental Council needs to equip patients and the public to recognise poor practise?

Yes,
Please give your reasons::
No harm in public being better educated.

Page 5: Area for change two: right-touch risk-based regulation

Q7 Do you feel you have adequate information about the Dental Council's approach to regulation?

Q8 A risk pyramid illustrates the connection between the desired actions and/or behaviours of a practitioner and the differing level of responses a regulator can use to encourage and/or achieve the desired action and/or behaviour. Do you think the Dental Council should develop a risk pyramid/matrix to explain the types and levels of risk and corresponding regulatory responses?
