Page 2: Information about the person or organisation completing this submission survey

Q1 This submission was completed by:

Name

Vimal Jacob

Company/organisation

Position

City/town

Email address

Q2 Are you making this submission survey

as a registered practitioner

Q3 Please tell us which part of the sector your submission survey represents

a registered dentist or dental specialist

Page 3: General question about recertification

Q4 Do you think the Dental Council needs to make changes to its current recertification framework?

Yes - but only minor changes

Please give your reasons::

Most of the current CPD programs are sponsored by different Dental material companies and thus it is mostly promoting specific products which may be misleading and biased. The New Zealand Dental Council should take necessary steps in auditing the CPD programs.

Page 4: Area for change one: public assurance

Q5 Each of the seven statements below are equally important components of good oral health care. We want to identify where there are gaps or weaknesses in the way our oral health practitioners serve the public. Please rank the components from 1-7, with one being the component you think needs the most improvement and seven being the component you think needs the least improvement:

- Patients are confident their practitioner will not harm them **5**
- Patients receive the appropriate treatment for their oral health concern or issue **4**
- Patients receive appropriate information about their treatment and care **2**
- Patients needs and concerns are discussed and addressed with their practitioner **7**
- Patients feel they are treated with dignity and respect at all times **3**
- Patients feel confident their practitioner has the knowledge and skills to treat them **6**
- Patients know how to complain about treatment they have received from their practitioner **1**

Q6 Do you think the Dental Council needs to equip patients and the public to recognise poor practise?

No,
Please give your reasons::
Poor practice should be recognized by the Dental Council and necessary actions taken (as has been the case till date) rather than involving the public and degrading the morale of the dentist/oral health practitioner.

Page 5: Area for change two: right-touch risk-based regulation

Q7 Do you feel you have adequate information about the Dental Council's approach to regulation? **Yes**

Q8 A risk pyramid illustrates the connection between the desired actions and/or behaviours of a practitioner and the differing level of responses a regulator can use to encourage and/or achieve the desired action and/or behaviour. Do you think the Dental Council should develop a risk pyramid/matrix to explain the types and levels of risk and corresponding regulatory responses?

Yes,
Please give your reasons::
This will improve the practice standards.

Page 6: Area for change three: risk identification

Q9 Which (if any) of these tools and mechanisms do you think the Dental Council should be using to identify and manage risk? **Practical training/experience for a period of time**

Q10 Are you aware of any other tools or mechanisms the Dental Council should be using to identify and manage risk? **No**

Q11 Do you think any of these risk tools or mechanisms are more effective than others? **Yes,**
Please give your reasons::
Practical training/experience for a period of time may improve the skills required to overcome the risks identified whereas other options may not help.

Page 7: Area for change four: early intervention

Q12 Do you think the Dental Council should explore the use of risk analysis and risk-profiling to identify poor practise sooner? **Yes,**
Please give your reasons::
This may ensure safe and good clinical practice.

Page 8: Area for change five: compliance

Q13 Do you think the Dental Council should explore the use of incentives to encourage practitioner compliance? **Yes,**
Please give your reasons::
This may encourage practitioners to comply.

Q14 What do you think the Dental Council could do differently to encourage practitioner compliance with its recertification requirements? Please explain:

Encourage more hands-on CPD programs.

Page 9: Area for change six: ongoing education and learning opportunities

Q15 Do you think the Dental Council should change its current amount of prescribed hours and peer activities? **No - the hours are about right**

Q16 Do you think the Dental Council should change the current length of its education and learning opportunities (CPD) cycle? **No - the cycle length is about right**

Q17 Please rank the following statements (with one being most important and eight being least important) according to the following question: Which actions should the Dental Council prioritise when considering its approach to ongoing education and learning opportunities?

Changing the current amount of prescribed hours and peer activities	6
Changing the current length of the education and learning opportunities (CPD) cycle	7
Permitting practitioners to set their own hours of education and learning opportunities and quantity of peer activities	4
Removing the requirement to have verifiable education and learning activities	8
Requiring practitioners to maintain an accurate record of their education and learning activities	3
Permitting practitioners to choose some of their education and learning opportunities from prescribed categories	2
Permitting practitioners to choose all of their education and learning opportunities from prescribed categories	5
Setting some mandatory education and learning opportunities based on the Dental Council's Practice Standards	1

Q18 Do you think the Dental Council needs to make any other changes or improvements to the ongoing education and learning process?

Yes - but only minor changes or improvements

Please tell us what other changes or improvements should be made and why::

Certain mandatory number of hands-on programs to be included in each CPD cycle.

Page 10: Final thoughts and comments

Q19 Do you have any other comments, suggestions or information you want to share with the Dental Council about recertification?

No
