

Greetings Colleagues,

I write in regards to your survey on *Age Limit for Restorative Activities* as I fail to understand the logic behind such a consultation when *Gillick Competence* is a clear, solid, international and established principle of consent in both medical and dental law.

I recommend that the answer you are seeking is through simply adherence to the international collective wisdom on the subject, as opposed to attempting to re-invent the wheel.

I wish you all well.

Regards,

Dr M Beentjes
