Q7 Please provide us specific comments related to the OHT scope, qualifications and competencies.

I note that diagnosis only relates to caries and periodontal disease; this may cause confusion in the public who may not understand the subtleties of this compared to what a dentist or dental specialist can diagnose

Q9 Please provide us your feedback

I welcome the requirement for training for adult scope. I believe that OHT will refer when something is outside their scope. My concern is that there is not enough time in their course to fully appreciate the implications of lots of medical conditions in order to understand why a particular individual may be outside their scope for medical reasons. However, this doesn't relate to this part of the change, but more to the approval of the additional training.
