Q5 Please describe your specific concern/s with the proposal

Therapists simply have not undergone enough training to thoroughly understand anatomy of permanent teeth, microbiology of mouth, intricacy of dental pulp, and post operative outcomes of restorative work. What will the Adult Restorative Programme include? Is that going to prepare the OHT for all kinds of direct restorative needed on adult teeth? What happens when pulp gets involved while performing restorative work? What if there is post operative sensitivity? Who looks after the patient then?
