

I do not believe the budget is appropriate. As an oral health therapist I believe the Monterey value and Increases in fees we are receiving are outrages in comparison to the income we receive. Also I do not understand how we are paying more then dentists when there overall workload is more risky then ours and also their income is so much higher then ours. As a part time worker juggling work and family, these increases are making this is profession that is now longer unattainable. I believe these need to be reassessed and prices brought down.
