Page 5: Working relationship - proposal 1

Q5 Agree

Retain a 'working relationship' as a scope of practice requirement for the dental therapy, dental hygiene, oral health therapy and orthodontic auxiliary professions.

Q6

Please comment below on your support or concern.

There needs to be a definition for working relationships

Page 6: Working relationship - proposal 2

Q7

Agree

The current working relationship for dental therapy, dental hygiene and orthodontic auxiliary practice be redefined as a consultative professional relationship, in line with oral health therapy.

Page 7: Working relationship - proposal 3

Q9

Disagree

The consultative professional relationship be defined as: The arrangement between an oral health practitioner and dentist to provide professional advice about treating and managing patients, within the oral health practitioner's scope of practice. It provides a clear and reliable way for the oral health practitioner to seek advice, and a potential pathway for referral.

Q10

Please comment below on your support or concern.

It states for referral meaning the dentist has not seen the patient first.

Page 8: Working relationship - proposal 4

Q11

Disagree

A signed written agreement is no longer be required for dental therapy, dental hygiene or orthodontic auxiliary practice, as it is anticipated that practitioners will reliably meet their responsibilities in the consultative professional relationship, consistent with the position held for oral health therapy. Practitioners may still choose to have a written agreement, or employers may require one.

Q12

Please comment below on your support or concern.

It is important to have a contract for services with the dentist or corporate owner and spell out those requirements who provides the equipment how you are paid. Hours or days of service or commissions. Uniforms, who provides and what to wear required or not.

Page 9: Working relationship - proposal 5

Q13

Agree

Describe the current working relationship for dental technology and clinical dental technology practice as a professional relationship between a technician and other health practitioners, to acknowledge the professionals involved and the oral health practitioners' professional obligations under the standards framework.No changes to the nature of this relationship are proposed, or to the current professional responsibilities of practitioners in this relationship.

Page 10: Working relationship - proposal 6

Q15

Agree

Remove the multiple 'working relationship' practice standards from the standards framework for oral health practitioners, and to publish the following two guidance documents to help practitioners understand and meet their professional relationship responsibilities: Guidance for the consultative professional relationship between an oral health therapist, dental therapist, dental hygienist, or orthodontic auxiliary and dentist/dental specialist Guidance for the professional relationship between a dental technician or clinical dental technician and other health practitioners

Page 11: Practising conditions for dental hygiene activities - proposal 7

Q17

Disagree

All activities in the dental hygiene scope of practice be performed within a consultative professional relationship without the need for clinical guidance or direct clinical supervision for the administration of local anaesthetic and application of prescription preventive agents. Direct clinical supervision will remain for dental hygienists undertaking orthodontic activities currently specified as being performed under direct clinical supervision. The specific requirements for the dentist to: implement the orthodontic treatment plan; be responsible for the patient's clinical care outcomes; and be on-site at the time of the orthodontic activities being performed, to be included in the relevant scope activity description.

Q18

Please comment below on your support or concern.

I agree with most of that but there should be a prior visit that was recent that the patient saw the dentist and updated the medical history and gave written ok for lidocaine local during scaling and rootplanning or no epi or dentist wrote direct supervision only . The dentist must see the patient and write an order for type of anesthesia and give written ok for it to be performed under general supervision

Page 12: Practising conditions for dental hygiene activities - proposal 8

Q19

Disagree

The clinical guidance and direct clinical supervision definitions to be removed from the hygiene scope of practice.

Q20

Please comment below on your support or concern.

Some patient have severe heart problems or other medical problems and are high risk. Some patients should be seen under direct supervision. Also not often enough emergency medical drills at office. Everyone should practice

Page 13: Practising conditions for dental hygiene activities - proposal 9

Q21

Agree

Update the Medical Emergencies practice standard to require dental hygienists to have access to and obtain the necessary training to safely administer adrenaline (1:1000) to manage an anaphylactic event (with an implementation period of a year to allow for training to occur).

Q22

Please comment below on your support or concern.

This training could save a life

Page 14: Practising conditions for dental hygiene activities - proposal 10

Q23

Agree

Update the dental hygiene scope of practice with the following activity being performed within a consultative professional relationship: obtaining and reassessing medical and dental oral health histories

Q24

Please comment below on your support or concern.

Hygienist are the gum specialists thats all we do is assess and treat and educate

Page 15: Practising conditions for dental hygiene activities - proposal 11

Q25

Agree

To not replicate the guidance ('should statements') in the current dental hygiene working relationship relating to a patient's initial assessment into the new consultative professional relationship guidance document. The new consultative professional relationship guidance document contains the following guidance: Identify any specific circumstances where you expect the oral health practitioner will ask for professional advice or assistance, for example: The interpretation of significant or complex medical histories and their potential influence when providing oral health care, including when planning to administer local anaesthetic.

Q26

Please comment below on your support or concern.

Absolutely agree

Page 16: Minor scope changes for orthodontic auxiliary practice for consistency across activities

Consultation on proposed changes to the working relationship requirements for oral health practitioners with dentists, and the practising conditions for dental hygiene activities

Q27

Agree

Make minor wording changes to the orthodontic auxiliary scope of practice to align the description of the same activities across the relevant scopes of practice.

Page 17: General

Q29

Yes

Are there any further comments you would like to made on the proposals?

Q30

Please comment below

Every patient is unique and must be evaluated on an individual basis. Some are high risk and should see a specialist and some it is better to treat when doctor and hygienist and support staff are present due to compromising medical history. It is hard to generalize when making guidelines.
