Page 5: Working relationship - proposal 1

Q5 Disagree

Retain a 'working relationship' as a scope of practice requirement for the dental therapy, dental hygiene, oral health therapy and orthodontic auxiliary professions.

Q6 Respondent skipped this question

Please comment below on your support or concern.

Page 6: Working relationship - proposal 2

Q7 Agree

The current working relationship for dental therapy, dental hygiene and orthodontic auxiliary practice be redefined as a consultative professional relationship, in line with oral health therapy.

Q8

Please comment below on your support or concern.

A consultative professional relationship better describes what already happens in the practices I work in as a hygienist. I would want that for any clinician especially a new clinician starting out in practice.

Page 7: Working relationship - proposal 3

Q9 Agree

The consultative professional relationship be defined as: The arrangement between an oral health practitioner and dentist to provide professional advice about treating and managing patients, within the oral health practitioner's scope of practice. It provides a clear and reliable way for the oral health practitioner to seek advice, and a potential pathway for referral.

Q10

Please comment below on your support or concern.

This statement may help the oral health practitioner to follow a team approach to patient care especially if they feel they are struggling with certain treatments or need a dentist to support them in the treatments proposed to the patient.

Page 8: Working relationship - proposal 4

Q11 Agree

A signed written agreement is no longer be required for dental therapy, dental hygiene or orthodontic auxiliary practice, as it is anticipated that practitioners will reliably meet their responsibilities in the consultative professional relationship, consistent with the position held for oral health therapy. Practitioners may still choose to have a written agreement, or employers may require one.

Please comment below on your support or concern.

Page 9: Working relationship - proposal 5

Q13

Agree

Describe the current working relationship for dental technology and clinical dental technology practice as a professional relationship between a technician and other health practitioners, to acknowledge the professionals involved and the oral health practitioners' professional obligations under the standards framework. No changes to the nature of this relationship are proposed, or to the current professional responsibilities of practitioners in this relationship.

Q14

Please comment below on your support or concern.

It is a professional relationship so should be described as such.

Page 10: Working relationship - proposal 6

Q15

Agree

Remove the multiple 'working relationship' practice standards from the standards framework for oral health practitioners, and to publish the following two guidance documents to help practitioners understand and meet their professional relationship responsibilities: Guidance for the consultative professional relationship between an oral health therapist, dental therapist, dental hygienist, or orthodontic auxiliary and dentist/dental specialist Guidance for the professional relationship between a dental technician or clinical dental technician and other health practitioners

Page 11: Practising conditions for dental hygiene activities - proposal 7

Q17

Agree

All activities in the dental hygiene scope of practice be performed within a consultative professional relationship without the need for clinical guidance or direct clinical supervision for the administration of local anaesthetic and application of prescription preventive agents. Direct clinical supervision will remain for dental hygienists undertaking orthodontic activities currently specified as being performed under direct clinical supervision. The specific requirements for the dentist to: implement the orthodontic treatment plan; be responsible for the patient's clinical care outcomes; and be on-site at the time of the orthodontic activities being performed, to be included in the relevant scope activity description.

Q18

Please comment below on your support or concern.

To be able to give LA the hygienist has received the necessary education and training. So should be competent to do so.

Page 12: Practising conditions for dental hygiene activities - proposal 8

Q19

Agree

The clinical guidance and direct clinical supervision definitions to be removed from the hygiene scope of practice.

Page 13: Practising conditions for dental hygiene activities - proposal 9

Q21

Agree

Update the Medical Emergencies practice standard to require dental hygienists to have access to and obtain the necessary training to safely administer adrenaline (1:1000) to manage an anaphylactic event (with an implementation period of a year to allow for training to occur).

Page 14: Practising conditions for dental hygiene activities - proposal 10

Q23

Agree

Update the dental hygiene scope of practice with the following activity being performed within a consultative professional relationship: obtaining and reassessing medical and dental oral health histories

Q24

Page 15: Practising conditions for dental hygiene activities - proposal 11

Q25

Agree

To not replicate the guidance ('should statements') in the current dental hygiene working relationship relating to a patient's initial assessment into the new consultative professional relationship guidance document. The new consultative professional relationship guidance document contains the following guidance: Identify any specific circumstances where you expect the oral health practitioner will ask for professional advice or assistance, for example: The interpretation of significant or complex medical histories and their potential influence when providing oral health care, including when planning to administer local anaesthetic.

Q26

Please comment below on your support or concern.

Patients can book with a Hygienist without first seeing a dentist. Some patients come from another practice for hygiene care because their dentist doesn't have a hygienist. The hygienist can consult at any stage with the dentist if there is something that needs clarification.

Page 16: Minor scope changes for orthodontic auxiliary practice for consistency across activities

Q27

Agree

Make minor wording changes to the orthodontic auxiliary scope of practice to align the description of the same activities across the relevant scopes of practice.

Q28

Please comment below on your support or concern.

This makes sense.
