Consultation on supplementary risk management principles for oral health during the COVID-19 pandemic

Q5

No

Do you support the proposed Supplementary risk management principles for oral health during the COVID-19 pandemic? If you do not support the draft, please share your concerns, reasons for your view, and proposed alternatives if you have any.

Q6

Please share any comments you have below:

In red light with cases in community, I think Full PPE -P2/N95 masks / gowns and eye protection should still be worn for low risk vaccinated patients. Vaccinated patients can pick up and pass on covid . When traffic light moves down to orange -not to many people in community ,then PPE can change to medical masks vs P2/N95 for low risk patients
