Page 5: Please provide your feedback by responding to the following question

**Q5**

**No**

Do you support the proposed Supplementary risk management principles for oral health during the COVID-19 pandemic? If you do not support the draft, please share your concerns, reasons for your view, and proposed alternatives if you have any.

---

**Q6**

Please share any comments you have below:

For ventilation and airflow key principles to consider, in addition to HEPA filters and UV-C to improve air quality, mention should be made of pathogen-scavenging (virus + bacteria + mould) technology that provides a continuous level of protection using ionized compounds (vaporized low-level Hydrogen Peroxide, Hypochlorous Acid, etc.), repurposed to target aerosolized or vaporized COVID-19, as well as other pathogens that may be encountered in the future. Please refer to page 24 of the following report <https://cimrtech.com/wp-content/uploads/2021/07/a-multi-layered-air-defense-model-to-protect-shared-air-in-critical-infrastructure-sectors.pdf>
