Q5

Yes

Do you support the proposed Supplementary risk management principles for oral health during the COVID-19 pandemic? If you do not support the draft, please share your concerns, reasons for your view, and proposed alternatives if you have any.

Q6

Please share any comments you have below:

It should be clarified if Patients required to undergo Surveillance testing (Such as oral health practitioners) are considered HIGH risk, because we are awaiting a Covid19 test outcome??? I understand the intent of the question, is to catch those patients who need a test due to any concern that has been raised, but from the reading of the guideline, it will also capture routine surveillance testing (in the short period while one awaits their result).
