**Q12**

Please tell us why:

I can only speak to this through the lens of a practitioner from the states, but the additional specialties included in this new pathway are completely analogous in their training and qualifications as those included in the "competent authority- qualification" pathway currently in place.

**Q16**

Please tell us why:

There is a similar program in place in the States, and many dental schools employ practitioners from countries who do not otherwise have a pathway to licensure. These professors are some of the brightest and best in their respective fields and I found this diversity was an asset to my education in dental school.

Page 9: Proposed removal of requirement for a medical degree for oral medicine specialist registration

**Q17**

**Support**

Do you support removing the requirement for a medical degree for oral medicine specialist registration in New Zealand, subject to the relevant medical training and clinical experiences being embedded into the specialist training programme? Click to learn more about the proposed changes.

---

**Q18**

Please tell us why:

It is completely reasonable to successfully achieve the relevant and required medical training and clinical experience within the specialist training program for Oral Medicine without awarding a "medical degree". Additionally, where University of Otago's program is no longer accredited, it appears this change would increase the number of qualified practitioners allowed to practice this specialty in NZ. This is a small but critical subset of dental medicine, and therefore expanding the pool of qualified applicants will be advantageous to dentistry in NZ as a whole.
