Q8

Agree

Do you agree/disagree with the updated draft Sedation practice standard?

Q9

Respondent skipped this question

If you disagree, please tell us why:

Page 5: Q2 - Sedation practice standard

Q10

Yes, more clarification or guidance needed

Are there any areas of the proposed Sedation practice standard you feel require further clarification or guidance?

Q11

If yes, please tell us which areas and why:

Please ensure that there is an ability to continue to provide mild sedation in the community, especially for children. The current environment has pushed a lot of work into the hospitals as there is no ability to provide the required support for moderate sedation (oral).

Having a single dose of oral sedation more for anxiolysis prior to an appointment would be very helpful and maybe enough to prevent a child needing to progress to secondary care and usually GA with ensuing long waits in our constrained system.
